

# *Art of Healing Circle Retreat*

*October 21-22, 2017  
Olive Bridge, New York*

*You are invited to participate in the Art of Healing Circle Retreat to be held in Olive Bridge, New York.*

*This retreat was created for the purpose of facilitating self healing. Through a series of lectures and exercises we learn about our nature as beings of light and how we move up the energy centers within, known as our chakras, to access higher states of being. Regardless of our spiritual evolvment, we all have access to the sixth chakra within, the gateway to God, to Intelligent Infinity. This is the chakra of self healing. Within this chakra is the higher self. People who have had a Near Death Experience (NDE) such as Anita Moorjani, and who underwent spontaneous healing, did so because they accessed this divine within. We all have access to the higher self, even without an NDE. This is the purpose of this event.*

*The Circle Retreat features the "Miracle of Self-Healing" exercise which allows us to identify issues that underlie our most prominent concerns and to heal these from within. We learn to use our life experiences as catalyst to facilitate personal healing and spiritual evolvment. As we access self-healing, we also facilitate healing for others.*
